

Project Design Phase-II

Data Flow Diagram & User Stories

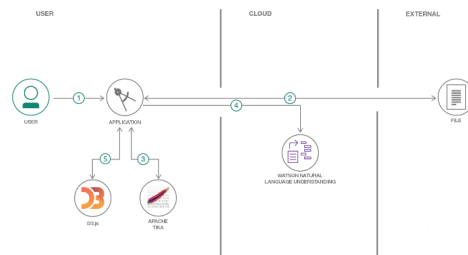

Date	30 September 2026
Team ID	SWTID-2026-7291
Project Name	Weather Wise
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a conventional graphical way of showing how information moves through a system. A well-drawn, easy-to-read DFD presents the required level of system detail visually. It illustrates how data comes into and goes out of the system, which processes transform it, and where it is kept.

Example:

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

User Stories

The template below is used to record every user story for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can sign up for the application by providing my email address and a password, and re-entering the password to confirm it.	I can get into my account / dashboard	High	Sprint-1
		USN-2	As a user, I will get a confirmation email after I have signed up for the application	I can receive the confirmation email and click to confirm	High	Sprint-1
		USN-3	As a user, I can sign up for the application using my Facebook account	I can sign up and open the dashboard using Facebook Login	Low	Sprint-2
		USN-4	As a user, I can sign up for the application using my Gmail account		Medium	Sprint-1
	Login	USN-5	As a user, I can sign in to the application with my email and password		High	Sprint-1
	Dashboard					
Customer (Web user)						
Customer Care Executive						
Administrator
