

Project Design Phase Solution Architecture

Date	30 September 2026
Team ID	SWTID-2026-7291
Project Name	Weather Wise
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is the process of designing a complete technology solution for the AI WeatherWise API. It connects user requirements with the appropriate software, APIs, AI services, and data storage. Its goals are to:

- Provide accurate weather information by connecting the AI WeatherWise API with reliable weather data sources.
- Describe the system structure and workflow, including the user interface, API, AI analysis module, database, and weather data service.
- Define features and requirements, such as current weather, weather forecasts, AI-based weather insights, alerts, and recommendations.
- Provide clear technical specifications for developing, managing, integrating, and delivering the AI WeatherWise API solution.

Example - Solution Architecture Diagram:
